

»»» Meet our extended team of excellent specialized trainers.

»»» Open courses and tailored in-house trainings for companies and institutions.

»»» Python for Scientists and Engineers

The course was very well organized and the content is explained well with examples and exercises. The tutor (Mike) is really helpful and his extensive python knowledge helps you to clear your issues and understand different concepts. I would highly recommend this training.

Advanced Python

I found the course to be very helpful. It will definitely have an impact on how I will write Python code from now on.

Petru Dumuta – Adobe

Python for Programmers

The trainer is excellent. The stuff he covers meets the expectation of a beginner or a professional equally.

Harikrishnan Narayana

Intermediate Python

Great course and great examples. Would recommend this and learnt a lot about Python and software in general.

James Dengel

High Performance Computing with Python

One of the clearest trainers we've ever had! High-level course material. Clarity in the exposition of the topics. Very good attitude of the trainer.

Course Participants

Python for Scientists and Engineers

Good explanations and examples – I would highly recommend this course. Mike has a wide range of experience which he happily shows – great.

Dominik Walsler – SW-Developer
